PROFESSIONAL SUMMARY

IT Support and Security professional with hands-on experience supporting Microsoft 365, hybrid Active Directory environments, enterprise Windows endpoints, and diverse business clients within a managed service provider. Experienced in Tier II troubleshooting, Microsoft cloud administration, identity and access management, endpoint security, and incident response. Proven ability to investigate account compromises, remediate endpoint threats, document technical findings, and communicate clearly with users and stakeholders. Building toward a SOC Analyst role through practical security work, CompTIA Security+ preparation, Microsoft security technologies, and hands-on lab training.

CORE TECHNICAL SKILLS

- **Microsoft Cloud & Identity:** Microsoft 365, Entra ID, Exchange Online, Intune, Conditional Access, MFA, SharePoint Online, OneDrive
- **Security Operations:** Microsoft Defender XDR, Microsoft Sentinel, endpoint isolation, malware remediation, alert triage, incident investigation, Windows Event Viewer
- **Systems Administration:** Active Directory, Windows Server, Group Policy, DNS, DHCP, BitLocker, Windows 10/11, user provisioning
- **Networking & Endpoint Support:** TCP/IP, VPN, SMB, Wireshark, Nmap, Datto RMM, patch management, remote support, device deployment
- **Development:** React, JavaScript, HTML5, CSS3, Git, GitHub, Vite

PROFESSIONAL EXPERIENCE

Help Desk Technician | First Class Networks | 2025-Present

- Provide technical support across numerous client organizations within an MSP, resolving Microsoft 365, Active Directory, networking, endpoint, and cloud-related issues.
- Investigate Microsoft 365 account compromise incidents using Microsoft Defender XDR, Microsoft Entra ID, Conditional Access, sign-in activity, session revocation, password resets, and MFA re-registration.
- Respond to malware and suspicious-process detections by isolating affected endpoints, reviewing alerts and Windows logs, validating containment, running remediation scans, and coordinating recovery.
- Administer Exchange Online, licensing, shared mailboxes, distribution groups, MFA, user onboarding and offboarding, and identity lifecycle tasks.
- Troubleshoot Windows, VPN, DNS, BitLocker, printing, scan-to-email, mapped drives, SharePoint, OneDrive, and Active Directory issues across varied client environments.
- Support workstation deployments, domain joins, Active Directory migration activities, kiosk rollouts, profile migrations, and Microsoft cloud initiatives in collaboration with senior engineers.
- Use Datto RMM and related remote administration tools to monitor, maintain, patch, and support enterprise endpoints.
- Document investigations, remediation steps, client communications, and repeatable procedures to support consistency and knowledge sharing.

CERTIFICATIONS

- Microsoft Certified: Microsoft 365 Fundamentals (MS-900)
- Google IT Support Professional Certificate
- CompTIA Security+ - In Progress

PROFESSIONAL DEVELOPMENT

- TryHackMe SOC Level 1 training and Microsoft Learn security coursework
- Windows Active Directory and Microsoft security home lab using virtual machines, Defender, Sentinel, Entra ID, and Sysmon
- Fedora-based cyberdeck project for portable cybersecurity administration and learning
- Built and deployed a responsive React/Vite professional portfolio using Git, GitHub, and GitHub Pages
